Water and energy-saving

Electronic technology

INCLUDES

Smart Shower

Imagine jumping out of bed, to find that the water in the bathroom is pre-heated for you at the perfect temperature. Imagine an intelligent control that allows you, with a simple gesture, to regulate temperature, modify the flow or pause it to lather up, and then resume at the touch of a button. Imagine having different customisable profiles so that you can configure the shower exactly to your liking. Imagine integrated cleaning programmes that eliminate bacteria and protect against staining from limescale and impurities. Stop imagining and make space for the new Roca Smart Shower.
